

Three Ways to Complete the 2021 Contractor Safety and Environment Orientation

The 2021 Contractor Safety and Environment Orientation videos are either required or recommended for use across Enbridge Liquids Pipelines (LP), Gas Transmission and Midstream (GTM), or Projects.

There are three ways contractors can complete these orientations as set out below (note Enbridge personnel or contingent workers are not required to complete this annual orientation). This fulfills general safety orientation requirements only. A site specific orientation is also required any time someone is new to a site or when conditions change or new hazards arise at a worksite.
